Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. Applicant's remarks filed 4/16/02 have been entered and carefully considered. Applicant's arguments are not found persuasive of patentability for reasons set forth herein below.

Claim Rejections - 35 USC § 103

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tsai et al (5698322) in view of Duckett et al (5783505), as set forth in the last action.

Applicant has not amended the claims in an attempt to overcome the prior art. Applicant argues that the web of Tsai does not have applicant's claimed permeability and void volume and that these properties are an unexpected result. The examiner agrees that the web of Tsai may not have applicant's claimed properties, but it is the examiner's position that the web created by the combination of Tsai and Duckett either inherently possesses said properties or, in the alternative, said properties would be an obvious modification of the web created by said combination. Applicant argues that said properties are achieved through "material morphology" and "surface science." With respect to "material morphology," said combination teaches all of applicant's claimed materials. This finding is untraversed and applicant does not argue that the instant invention alters the inherent material morphology in any way. With respect to "surface

science," this vague reference is not accompanied by any specific reason why the instant web differs from the web created by the combination of Tsai and Duckett. Said rejection is maintained from the last action.

Conclusion

4. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher Pratt whose telephone number is 703-305-6559. The examiner can normally be reached on Monday - Friday from 7 am to 4 pm.
